

KeySafe AFTER HOURS issue of Guest Keys!

KeySafe Remote Management Option

For Secure Remote Dispensing of Keys

This remote management option allows you to securely manage your property and issue room keys, car keys, locker keys or other by remote control from your iPad, desktop or even your web enabled mobile phone.

This software and hardware combination is a plug in option to our current model KeySafe; older KeySafes can be upgraded.

This software allows full flexibility to drop keys from one or more locations using a web application. All you need is an internet connection and compatible router, we help set it up.
